**Fourth**

**8. Expected learning outcomes of the program**

**Knowledge**

ing the labor market with the necessary skills from human resources. -	Providing graduates who are able to perform economic analysis and predict economic variables. -
	Disseminating knowledge in government institutions to achieve the aspirations of society. -

**Skills**

ty of economics graduates to conduct -	The ability to solve economic problems that -
--	---

economic feasibility studies and economic analysis.	-	economic activity suffers from, such as inflation and recession. Exchange of experiences and data with ministries with economic decision-making powers	-
outputs should be knowledgeable and how to accomplish the tasks assigned to them.	-	Providing economic advice to the public and private sectors.	-
<b>Values</b>			
professional ethics and the ability to demonstrate high professional competence.	-	Establishing social and ethical responsibility. Serving the community and meeting its requirements.	-
it must believe in the principles of integrity and transparency, and have the ability to apply the concepts of quality management.	-	Integrity and transparency. Quality.	-
<b>9. Teaching and learning strategies</b>			
Encouraging students' active participation in learning processes, such as discussions, activities, and problem solving, to enhance their deep understanding of mathematical concepts.	.1		
Cooperative learning: Encouraging students to work together in small groups to solve problems related to their studies and sharing ideas, which contributes to enhancing interaction and knowledge exchange between them.	.2		
Technology: Leveraging technology to provide interactive learning tools such as computer software and online resources to enhance student understanding and motivation.	.3		
problem-based learning: presenting specific problems and motivating students to think critically and use skills to solve it.	.4		
Instructional Strategies: Providing a variety of instructional strategies, such as interactive lectures, practical lessons, and hands-on exercises, to meet the diverse needs of students.	.5		
Administrative: Encourage students to develop thinking skills. Such as analysis, planning and inference, by providing stimulating questions and applied problems.	.6		
Immediate feedback: Provide mechanisms to provide immediate feedback to students on	.7		

their performance and understanding of concepts. Administrative, whether through periodic assessments or direct interaction with the teacher.

### 10. Evaluation methods

om performance assessment: This includes assessing students' performance during lessons, .1  
 and workshops, whether through written tests or continuous assessment of their participation  
 and understanding of the material.

articipation in discussions and activities: Students' participation in class discussions, group .2  
 and individual projects can be assessed to assess their understanding and engagement with  
 the material.

nd assignments: Students may be given regular tests and assessment assignments to assess .3  
 problem solving skills related to their field of expertise and their understanding of the concepts  
 presented.

ing participation in research: The extent to which students participate in research activities .4  
 scientific projects can be assessed, and an evaluation can be provided of their presentation style  
 and analysis of their results and conclusions.

Practical Performance Evaluation: Students can be evaluated in practical performance .5  
 through: Visits Process and participation in applied activities.

n of external participation: This includes evaluation of the extent of students' participation .6  
 in external activities such as conferences, seminars, and sports competitions.

of Personal and Professional Development: Students' personal, professional and academic .7  
 development can be evaluated during their participation in the faculty mentoring program.

<b>Professional development</b>				
<b>Orientation of new faculty members</b>				
determining the needs of the university and the department:	The needs of the university and the department are determined in terms of the required educational cadres. And preferred majors.	- ١		
Orientation Programs:	Customized orientation programs are designed for new, visiting, full-time and part-time members based on their needs and specialties.	- ٢		
Introduction to the University Environment:	A comprehensive introduction is provided about the university and the department. General Administration, including About the Department vision And the message The objectives and services available.	- ٣		
Providing support resources:	New members are provided with the necessary resources and support, including training courses, workshops, and technical assistance.	- ٤		
Academic Orientation:	New members are oriented regarding the curricula, research areas and teaching methods used in the department.	- ٥		
Administrative Orientation:	New members are oriented to administrative procedures, responsibilities, university policies and code of conduct.	- ٦		
Ongoing Support:	Ongoing support is provided to new, visiting, full-time and part-time faculty members through advisory sessions, workshops and periodic evaluations.	- ٧		
<b>Professional development for faculty members</b>				
Identifying needs and setting goals:	Faculty needs are identified through surveys and performance evaluations, and then specific goals to be achieved within the program are identified.	- ٨		

Development Program Design: Based on the specific needs and objectives, a comprehensive .٢	program is designed that includes a set of activities, training courses, workshops, and educational resources.
ram implementation: The development program is implemented in a regular and organized .٣	er, including organizing workshops, conducting training courses, and providing appropriate educational resources.
effective teaching strategies: Faculty members learn to use and apply modern and effective .٤	aching strategies, such as cooperative learning, active learning, and educational technology.
ation of learning outcomes: The effectiveness of the development program is evaluated by .٥	aluating the learning outcomes of faculty members, such as increased levels of knowledge, teaching skills, and interaction with students.
s Development: Ongoing feedback and support is provided to faculty members to promote .٦	ngoing professional and academic development.
on in scientific research and publication: Faculty members are encouraged to participate in .٧	tific research and publish the results in prestigious academic journals, which enhances their academic standing and contributes to the development of knowledge in their fields.

## 12. Acceptance Criteria

	Central acceptance. -١
exceptions (martyrs' families, children of faculty, distinguished employees, top students in -٢	institutes, foreign students).
	Private government education -٣
	Accepting evening studies. -٤

## 13. The most important sources of information about the program

	University, college and electronic department website. -١
	Priorities for establishing the department. -٢
to develop and update the curricula of the faculties of management and economics in Iraqi -٣	universities for the year 2017.

## 14. Program Development Plan

	Developing curricula for each subject by the instructor. -١
a branch of the third stage (economic teachers) and opening postgraduate studies, a higher diploma -٢	equivalent to a master's and doctorate.

Developing teaching and administrative staff through courses, seminars and workshops in areas of specialization. -۳

Encouraging scientific research efforts by encouraging faculty members to publish, especially in international journals. -۴

Organizing training programs to develop students' capabilities in technical and information technology fields. -۵

Organizing field visits and scientific trips for students to government institutions. -۶
